

Chapter 1 **GUIDED READING**

Directions: Review the main ideas. Then, answer the following questions.

Section 1.1 Introduction to the Web

Main Ideas

The Internet is a worldwide network of hardware. The World Wide Web is part of the Internet. Web sites are divided into categories that meet particular needs.

1. Explain the difference between the Internet and the World Wide Web. _____

2. A(n) _____ is a group of related files organized around a common topic.
3. A(n) _____ usually contains the general information about a Web site.
4. A(n) _____ is special software that interprets files to display Web pages.
5. A(n) _____ is a uniquely named file within a Web site.
6. Identify one major type of Web site and give an example of it. _____

Section 1.2 Elements of a Web Page

Main Ideas

Web pages are composed of many different elements: text, graphics, multimedia, and hyperlinks. Hyperlinks link Web pages together and help a user navigate through a Web site.

7. In the table below, list the three types of multimedia and give examples of how each type can be used on a Web site.

Type of Multimedia	How It Is Used on a Web Site

8. Name and describe the three different types of links. _____

CHAPTER 1 Guided Reading
